

Language Development “More”

Choose a motivating toy, game, or snack that provides opportunities to stimulate multiple requests for “more”.

Say/sign, “more?” (as though asking a question). Pause and look expectantly at child, waiting for a response.

Accept any vocal or non-speaking response as “more”, by rewarding with more, and modelling, “more”.

Repeat the process with different rewards to provide further opportunities to practise.

Activities for “More”

Toys: Ball run, car run, bubbles, cause-and-effect toys (e.g. press button for lights/sounds)

Food: anything with small pieces to increase opportunities to practise (e.g. pieces of fruit, raisins, crisps, sweets)

Games: anything with a stop/start to provide opportunities to request “more” (e.g. swings, slide, balls, balloons)

Be creative and (most importantly) have FUN!
